## **DETAILED ACTION**

### **STATUS**

Claims 1-19 are pending.

### ***Response to Arguments***

The Applicant's arguments filed on December 23, 2005 have been fully considered. The examiner submits that the pending claims are subject to restriction requirements. See following rejection.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12 are drawn to content protection with an intermediate key, classified in class 705 subclass 51.
  - II. Claims 13-16 are drawn to processing with an identification signal, classified in class 705 subclass 50.
  - III. Claims 17-19 are drawn to a processing a signal, classified in class 713 subclass 1.

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in invention I does not require the particulars of the subcombination as claimed in inventions II or III such as an identification signal or a heading pattern detection means.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Conclusion***
